Our Story

Founded in 2000, Eagle Automation is an automation and measurement solutions provider. The Company operates from six locations stretching from Texas to Wyoming, addressing automation, instrumentation and control needs, including two certified custom panel shop locations. We offer end-to-end solutions through technical and engineering expertise, talented service technicians that are specialists in their fields, and critical products that address our customers' largest needs.

Our approach is to provide modular and easily deployable solutions that minimize complexity and required field installation time and resources. Our service offerings include systems engineering, remote data collection, IT integration, hosting and visualization, SCADA system design, and product installation.

We pride ourselves on asking the right questions to fully understand our customers' needs, and then executing an engagement that meets the needs of today while allowing scalability for the years ahead.
